

# Economics 210: Economics of the Family\*

Jeremy Greenwood

August 2021

## 1 Description

This course will study modern family economics. The class will develop economic models to study topics such as female labor supply, fertility, marriage and divorce, women's liberation, premarital sex and parental socialization, investment in health, and retirement. This is an advanced undergraduate class. Calculus is an *integral* part of the course. Some elementary probability theory is drawn upon. Students unwilling to learn some of the tools used in modern economic should not take this class.

## 2 Grading

The course will be evaluated on the basis of two equally weighted take-home exams. *No* collaboration with *any* person (either in or out of the class)

---

\*May be subject to change.

is allowed for the exams. Only clarifying questions about the exam that are posted on Canvas (so everyone can see) on the Thursday and Friday immediately following the handout day will be answered. The exams are graded on a mixture of the skills you show in economics and mathematics. A penalty, which is strictly enforced, is assessed for each day an exam is late: 10% for the first day and 15% for each day thereafter. The take-home exam schedule is below.

#### Take-Home Exam Schedule

<i>Handed Out–Tentative</i>	<i>Due–Tentative</i>
Wed, Oct 27th	Wed, Nov 3rd–Noon
Wed, Dec 1st	Wed, Dec 8th–Midnight
